PROFESSIONAL SUMMARY

Software and AI developer with experience across full-stack web development, generative AI, machine learning, and data analysis. Builds React, Node.js, and FastAPI applications, LLM agent workflows with LangGraph and MCP, deep learning models in TensorFlow and Keras, and data analysis in Python and SQL. B.Tech in Artificial Intelligence; completed a Data Science and AI program (Python, SQL, ML, Deep Learning, Power BI, Probability, Statistics).

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, SQL

Web & Backend: React, Vite, Node.js, Express, FastAPI, REST APIs, Tailwind CSS, HTML5, CSS3

Generative AI: LangGraph, MCP, Llama 3 chatbot, OpenRouter, Gemini, Ollama, LLM agents, prompt-based workflows

Machine Learning & Deep Learning: Scikit-learn, Logistic Regression, TensorFlow, Keras, OpenCV, CNNs, Vision Transformers
Data Science & Analytics: Pandas, NumPy, EDA, Feature Engineering, Statistics, Probability, Matplotlib, Seaborn, Power BI, Streamlit

Databases & Tools: PostgreSQL, MongoDB, SQL, Supabase, Git, GitHub, Vercel, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Developer

10/2025 – Present

Tech Tech Pvt. Ltd.

Pune, India

- Develop and maintain web application features with JavaScript, React, and Node.js, building responsive UI components and REST API integrations across the full SDLC.
- Integrated a Llama 3 chatbot into web applications to automate query handling and conversational support.
- Work with MongoDB and SQL databases for CRUD operations, validation, schema design, and query optimization.
- Apply data analysis and machine learning knowledge when designing data-backed features and AI integrations.
- Work concurrently on multiple internal and external projects and products, balancing priorities and delivery timelines.
- Debug, troubleshoot, and optimize application performance; collaborate with cross-functional teams in Git-based workflows.

Machine Learning Intern

07/2023 – 01/2024

Education4ol

Pune, India

- Performed end-to-end EDA on the Seoul Bike Rental Demand dataset (8,700+ records), uncovering demand patterns by weather, season, holiday, and hour.
- Cleaned data, engineered features, and built Matplotlib visualizations with Pandas and NumPy to communicate insights.
- Assisted computer vision projects including Landmark Detection: preprocessing, augmentation, and dataset preparation with TensorFlow, Keras, and OpenCV.
- Documented experiments and model evaluation results using Git-based workflows.

PROJECTS

AgentFlow: Full-Stack AI Agent Platform | GitHub

React, Vite, FastAPI, LangGraph, MCP, PostgreSQL, OpenRouter, Gemini

- Built a React/Vite and FastAPI agent platform using LangGraph StateGraph to route between direct responses and tool execution, with REST endpoints for agents, sessions, chat, and execution history.
- Integrated MCP tools (calculator, current-time lookup, text statistics) and Gemini/OpenRouter provider adapters; stored sessions and run history in PostgreSQL.

Landmark Detection using VGG19 | GitHub

Python, TensorFlow, Keras, OpenCV, Pandas, Scikit-learn

- Built a landmark classification pipeline training VGG19 from scratch on a 20,000-image subset of Google Landmark Recognition V2 (224×224 inputs, 15 epochs, 80/20 train-validation split).
- Performed EDA on class distribution and imbalance; implemented batching, normalization, label encoding, BatchNormalization and 50% Dropout, with fallback handling for corrupt images; saved the trained model.

Psychological Well-Being Prediction | GitHub

02/2024 – 06/2024

Python, Pandas, Scikit-learn, Logistic Regression, Streamlit

- Built a Logistic Regression classification pipeline with preprocessing, categorical encoding, and mutual-information feature selection; achieved **75.67%** accuracy.
- Evaluated results with accuracy, precision, recall, and confusion matrix; shipped a Streamlit analytics interface for prediction.

EDUCATION

B.Tech in Artificial Intelligence

06/2020 – 06/2024

G.H. Raison College of Engineering and Management, Wagholi, Pune

CGPA: 8.25

CERTIFICATIONS & TRAINING

- Data Science and Artificial Intelligence Program**, Seven Mentors (Jan–Oct 2025): Python, SQL, Machine Learning, Deep Learning, Power BI, Probability, Statistics Dec 2025
- Tata Data Visualization: Empowering Business with Effective Insights, Forage Apr 2025
- Accenture Data Analytics & Visualization Virtual Experience Program, Forage Sep 2024
